

# SKIVING MACHINE

**ATOM CK 12 BC - EX**

All the models share some common technical features:

- Knife shaft mounted on bearings;
- transport roller gears run in an oil bath;
- on demand gears can be supplied to allow several working speeds.

It is possible to equip them with optional tools for **45 degrees skiving used in moccasin manufacturing.**

**More sophisticated models: higher flexibility and optimised results.**

- CK-12BC-EX: Transport speed set with **mechanical clutch** mounted on the machine head. It is available as well as in the "head only" version,
- **Technical features:**
