

P64

Hydraulic press BANF two cylinders P64 for insoles.

Machine very noiseless, it permits a production higher than any other in trade, for its approach speed of the pistons.

The dimension of the pistons, with large diameter, permit high power in tons without high-pressure working, therefore with a greater safety of employment.

Its hydraulic system, easy and practical, is the better warranty of elimination of any trouble and obstacle.

Technical data

Weigh without oil: kg 620
Dimensions: mm900x670x1650
Motor: HP 2
Obtainable power: t 32
Pistons diameter: mm 182
Highest port of planes: mm 230
